Discover IC4C SharePoint (China version of Showpad) update. Our goal is to equip you with the most up-to-date collateral and resources for your self-learning and customer engagements.

Platform and Product: The most important update is the software sales enablement materials.

• NI AI-Empowered and Software-Centric Testing Platform is a detailed and general material can be used to help customers get familiar with NI toolchain.

• On November 21st, a meeting was held to equip our sales with NI software knowledge. Find the recording and slides in Software Sales Training, which will be of significant support for your customer engagements.

• Introduce NI new hardware products using the localized slides NI New Hardware Products to customers and find related materials in the corresponding folder NI New Hardware Products.

• Build an Operational Closed-loop AI Testing System Using NI SystemLink includes demo videos and slides for promoting SystemLink.

HIL: NI SOME/IP Toolkit Version 2.1 is released along with IPA, promotional materials, and sales enablement materials.

NI SOME/IP Toolkit can be used in applications such as restbus simulations and HIL. Customers can now purchase the toolkit through a PTOBUNDLE number. Please make use of the materials to promote the product and engage with customers.

RF: YouTube Software Defined Radio (SDR) video series with Chinese subtitles are available with corresponding slides.

See how NI enables wireless researchers and engineers to achieve communications technology breakthroughs and delivery of next-gen devices at scale with our fast and flexible software defined radios. The series is great for webinars.

Find more series in Youtube Video Series with Chinese Subtitles.

SEBU: 2 more locally focused application notes are released.

2 more locally focused application notes are now available. Check out [Application Note] Customized Application Case of Part Average Testing (PAT) and [Application Note] Performing L-PAMiD Mass Production Testing Using NI STS.

Nigel: Use the localized video and flyers to promote Nigel to local customers. You can also find how to use Nigel on MacOS for your work computer.

The Nigel™ AI Advisor is purpose-built for test and measurement workflows. It enhances engineering efficiency through intelligent automation while keeping you in control of every engineering decision. Highlight Nigel's values to local customers using the localized content.
